EQUIPMENT CERTIFICATION

Equipment:	Slip-type Elevator
Manufacturer:	AOT
Model:	HYC
Capacity:	200 Ton
Serial Number:	E55310 28522
Load Test Number:	MLC-20199LT0711
Reference:	CCE H-1

The above elevator was examined in detail on March 26, 2019 at Maple Leaf Consulting's shop. The above elevator was fully disassembled and sandblasted for a C.A.O.D.C. RP-2.0 Level IV inspection. Magnetic particle and/or visual inspections were completed on all accessible areas of the body, door, latch, secondary latch, hinge pin, latch pin, secondary latch pin, and latch spring.

Based on the inspections, it is our opinion that the unit is safe to operate within its rated capacity when used in accordance with the manufacturers' specifications and/or industry standards.

In accordance with C.A.O.D.C. RP-2.0, a certification period of 500 operating days is recommended. Due to the nature of Canyon's business, this **certification is valid for a period of 2 years** or until the unit has been damaged structurally by either handling or operation. Unengineered structural modifications to this unit will void this certification.
