EQUIPMENT CERTIFICATION

Equipment:	(4) YC Elevator Segments
Manufacturer:	Oil Country Manufacturing
Size:	5½" YC
Capacity:	75 Ton
Serial Number:	24072

The above elevator segments were examined in detail on April 5, 2019 at Maple Leaf Consulting's shop. The units were in a fully disassembled condition. Magnetic particle and visual inspections were completed on all accessible areas of the above segments.

Based on the inspections, it is our opinion that the units are safe to operate within their rated capacity when used in accordance with the manufacturers' specifications and/or industry standards.

In accordance with C.A.O.D.C. RP-2.0, a certification period of 500 operating days is recommended. Due to the nature of Canyon's business, this **certification is valid for a period of 2 years** or until a unit has been damaged structurally by either handling or operation. Unengineered structural modifications to a unit will void this certification.
