EQUIPMENT CERTIFICATION

Equipment:	Casing Elevator
Manufacturer:	AOT
Model:	HYC
Capacity:	200 Ton
Serial Number:	101365
Load Test Number:	E55310 101365 11/10
Reference:	CCE H-2

The above elevator was examined in detail on March 25, 2019 at Maple Leaf Consulting's shop. The above elevator was fully disassembled for a C.A.O.D.C. RP-2.0 Level IV inspection. Magnetic particle and/or visual inspections were completed on all accessible areas of the body, door, latch, secondary latch, hinge pin, latch pin, secondary latch pin, latch spring, 7⁵/₈" setting plate, and (4) segment bolts.

Repairs were completed by Maple Leaf Consulting and Comet Welding's staff. Based on the inspections and a review of repairs (April 5, 2019), it is our opinion that the unit is safe to operate within its rated capacity when used in accordance with the manufacturers' specifications and/or industry standards.

In accordance with C.A.O.D.C. RP-2.0, a certification period of 500 operating days is recommended. Due to the nature of Canyon's business, this **certification is valid for a period of 2 years** or until the unit has been damaged structurally by either handling or operation. Unengineered structural modifications to this unit will void this certification.
